E100 Product Data

Sentinel: E100 Fire-point Cabinet

Constructed of UV-stabilized MDPE, our new rotationally-moulded range of fire-point cabinets are built to withstand the most hostile of environments- they are now completely free of any perforations- even meeting IP65 specification when fitted with the optional gasket. The new over-centre draw-latch mechanism is protected from damage by integral side-walls- further ensuring that your Fire Protection equipment is kept in pristine condition for many years. Warning decals are supplied as standard into the prepared surfaces.

Accessories - The E100 is available with a range of equipment designed to ensure your Organisation will comply with Fire Legislation - all fixings externally are provided with solid brass or stainless steel inserts moulded-in as standard.

Automatic Fire Alarm - The alarm unit performs a dual role; this device produces over 100dB and meets legislation requiring that Fire-points must have a Means of Raising the Alarm - only this alarm goes further - it has an integral strobe light to assist identifying the correct Extinguisher in the dark during an emergency. This alarm has also proved an effective deterrent to person's intent on tampering/theft.

Automatic Solar-powered Beacon - Practically, it's not always possible to mount your Fire-point cabinet under a light - yet legislation states 'Fire-point Cabinets must be visible at all times' this highly-efficient device will ensure your Fire-point is still visible over 200 metres away - and automatically recharges itself during the day.

E100 - Outdoor & Leisure Fire-point Cabinet: Technical & Specifications	
Overall Height (with Solar Beacon)	827mm (938mm)
Footprint Minimum (max)	490 X 240-120Rmm (650 X 352-176Rmm)
Over-centre Draw-latch	Polypropylene Compound, Glass Fibre Reinforced
Capacity	2 X 9 Lt or 2 X 9 Kg or 2 X 5 Kg CO ² Units (or mixed)
Mounting Base - recommended	600 X 600 X 50mm (Slab or other suitable sub-base)
Net Weight - nominal	5 Kilograms
Warning Decals - Standard	Site Specific

Cheshire Fire reserves the right to change specifications without formal notice.

Quick-release Cabinet Mounting Clamp - High-grade stainless-steel mechanism - traditional methods of fixing the Fire-point Cabinets involved screwing through the base - this usually meant a loss of integrity and allowed ingress of moisture, water and insects - the new system changes all that yet allows rapid removal for cleaning etc.

Co-extruded EPDM bulb seal- lipped and tongued into housing to achieve IP65 protection against Dust & Water
