Insulated Fire Hose Reel Cabinet

Sentinel: HR500 Fire-point Cabinet

Constructed of UV-stabilized MDPE, our new rotationally-moulded range of fire-point cabinets are built to withstand the most hostile of environments. Our new Fire Hose-reel cabinet is no exception; the standard product now boasts an insulated interior in addition to the galvanised cradle, making this equipment a must-have for any coastal or mountainous region- the days of draining down this equipment for the winter months can be finally be consigned to history. For the harsh sub-zero regions, the optional heater will cut in automatically but you don't need to worry about your heating bill; this highly-

efficient insulated system ensures that it will switch itself off just as fast. The required warning signage is all supplied as standard onto the prepared surfaces

Accessories - The HR500 is available with a range of equipment designed to ensure your Organisation will comply with Fire Legislation - all fixings externally are provided with solid brass or stainless steel inserts moulded-in as standard.

Automatic Fire Alarm - The alarm unit performs a dual role; this device produces over 100dB and meets legislation requiring that Fire-points must have a Means of Raising the Alarm - only this alarm goes further - it has an integral strobe light to assist identifying the correct Extinguisher in the dark during emergency. This alarm has also proved an effective deterrent to person's intent on tampering/theft.

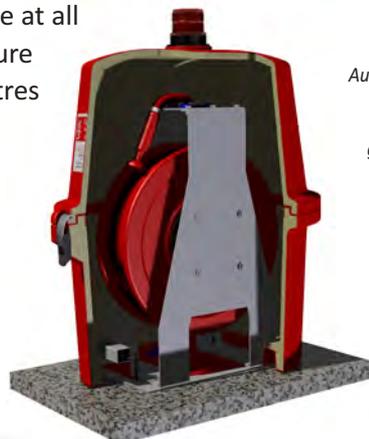

HR500 - Outdoor & Leisure Fire-point Hose Reel Cabinet: Technical & Specifications	
Overall Height (with Solar Beacon)	940mm (1043mm)
Footprint Minimum (max)	869 x 566mm
Over-centre Draw-latch	Polypropylene Compound, Glass Fibre Reinforced
Capacity	1 x 19mm x 30 metres or 60 metres, 1 x 25mm x 30 metres
Mounting Base	900 X 600 X 50mm (pressed and machined concrete)
Warning Decals - Standard	Site Specific

Cheshire Fire reserves the right to change specifications without formal notice.

Automatic Solar-powered Beacon - Practically, it's not always possible to mount your Fire-point cabinet under a light - yet legislation states 'Fire-point Cabinets must be visible at all

times' this highly-efficient device will ensure your Fire-point is still visible over 200 metres away - and automatically recharges itself during the day.
